

BDT

ULTIMATE TANKLESS MOSQUITO SYSTEM

- Aesthetics – No Drum
- Economical and dependable
- On demand precise mixing every time
- Weather and corrosion resistant
- 3 function extended range remote control
- Tamper Proof - Lockable cabinet

The Bug DeFence Tankless System is the industry's most advanced tankless digital mosquito misting system. With enhanced programming capabilities, excellent quality, reliability and attractive design all at an affordable price. Available in both Digital and Analog and absolutely no drum.

BDT System - The ultimate in mosquito control for your home or business

The Bug DeFence Tankless system (BDT) is the industries most advanced and reliable direct injection system. Its superior design and quality components allow the BDT system to outperform and outlast other injection style and drum mount systems. For enhanced accuracy the BDT system uses a precise direct injection technology to automatically mix solution. This means that chemical concentrations remain consistent and well mixed each time the system is activated, which in turn maximizes performance and prevents downtime.

The BDT is available with either an analog or digital controller (as shown below). While both offer the same Bug DeFence quality, dependability and variable run times, the BDT digital provides advanced programming and diagnostics for enhanced functionality, precise application and reliability.

Features of the BDT Controller

- Integrated Controller Design - pump and programmable controller in one clean polished system
- Electrical Surge protection
- Advanced Programming Capabilities - Event Timer, Repeat Cycle, Everyday, Individual Day, Weekday/Weekend *
- Digital Display with Touch Pad Programming and Indicator Lights for Accessories - Rain, Wind, Tank Level, Auto Run, Alarm Pump, Tank Mixer *
- Adaptive Microprocessor with Real Time Clock *
- Internal Battery back up *
- Password protection *
- Data Collection Capabilities: Runtime, Pump Hours, Daily Peak Temperature, Daily Peak Current *
- Board mounted RF (radio frequency) receiver - extended range

* Available on digital controller only

BDT Digital System

BDT Analog System

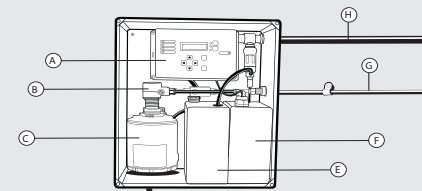

Ideal For:

Patios
Tennis Courts
Greenhouses
Resorts/Hotels
Shopping Centers

Gazebos
Rockscapes
Barns
Loading Docks
Factories

Pool Areas
Landscapes
Restaurants
Nurseries
Warehouses

Standard Install Configuration

PART	DESCRIPTION
A	BDT Controller
B	Pump
C	Motor
D	Power Cord
E	Concentrate Tank
F	Solution Tank
G	Discharge Line
H	Inlet Water Line

Tankless vs. Tank Systems

- Aesthetics – Absolutely no drum.
- On demand Mixing - prevents solution from settling to the bottom of the drum.
- Precise mixing and measurement of solution every time.
- Environmentally sound – protects against potential chemical spills.

Optional Accessories for the BDT:

3-function remote

Rain Sensor

Wind Sensor
